nvolve

# Technical Proposal.

AI-driven event infrastructure for modern, scalable experiences — built for speed, scale, and intelligence.

DATE

April 2026

# A high-performance platform for rapid event deployment.

We propose building a scalable website and event platform that enables intelligent automation and measurable results across the entire lifecycle.

SETUP TIME

**-60%**

Faster event launches end-to-end

ENGAGEMENT

**1.8 – 2.2×**

Lift in attendee participation

TIME TO LIVE

**5 – 10 days**

Plug & play deployment

## TYPICAL TIMELINE

**Day 1 – 2**
Discovery & planning

**Day 3 – 5**
Development & integrations

**Day 6 – 8**
Testing & optimization

**Day 9 – 10**
Launch

# 01

# The Opportunity.

Modern event teams are stitching together six tools and still flying blind. We see a different path — one platform, one source of truth, end to end.

WHAT'S INSIDE

- The four pain points facing event teams today
- Our integrated approach: Plan → Promote → Execute → Analyze

# Event teams face operational complexity every day.

Four problems we hear consistently from operations leaders running modern, large-scale events.

PROBLEM 01

## Tool fragmentation

Teams stitch together 4 – 7 different tools, creating overhead and integration friction across the stack.

PROBLEM 02

## Manual content creation

20 – 40 hours spent per event drafting agendas, emails, and marketing copy by hand.

PROBLEM 03

## No real-time visibility

Up to 25% attendee no-show rate, with no live signal to react in the moment.

PROBLEM 04

## No data reuse

Attendee insights are lost after each event — no compounding optimization across the portfolio.

# The full event lifecycle in one intelligent platform.

PHASE 01

## Plan

AI-assisted agenda creation

Smart scheduling & conflict detection

PHASE 02

## Promote

Email & WhatsApp automation

Integrated campaign tracking

PHASE 03

## Execute

Real-time dashboards

Fast check-in & on-site management

PHASE 04

## Analyze

Post-event insights

Performance tracking & optimization

# 02

# Proven at Scale.

Hosted in KSA, battle-tested at national events. Real numbers from Saudi Made and the LinkedIn campaign that turned every attendee into a referral channel.

WHAT'S INSIDE

- Why nvolve — selected projects
- nvolve.in referral campaign for Saudi Made
- Saudi Made case study and success metrics

# Trusted by major initiatives across Saudi Arabia.

Proven execution at national scale — government-backed programs, large conferences, and cultural events.

03

# How It Works.

Under the hood — a modern stack, four AI assistants, and a real-time control center that runs the day of the event.

WHAT'S INSIDE

- Platform architecture and infrastructure
- AI capabilities — Scheduler, Content, Analytics, Ticketing
- The live event control dashboard

# Hosted in-region. Built to scale.

A SaaS deployment with single-tenant available, hosted inside the Kingdom on Alibaba Cloud KSA — engineered for high-traffic event launches.

- SaaS, with single-tenant setup available on request
- Hosted in KSA on Alibaba Cloud regional zones
- Optimized for high-traffic registration spikes

CONCURRENT USERS

**50,000**

Active sessions held simultaneously without degradation

UPTIME SLA

**99.99%**

Multi-region hosting in KSA with automated failover

# Four AI assistants powering the platform.

Built using AI-driven automation, content generation and analytics models.

ASSISTANT 01

## Scheduler AI

Builds optimized agendas

Handles multi-track events

ASSISTANT 02

## Content AI

Generates event descriptions, emails & campaigns

Native Arabic and English

ASSISTANT 03

## Analytics AI

Tracks engagement in real time

Predicts attendance behavior

ASSISTANT 04

## Ticketing AI

Suggests pricing strategies

Helps maximize revenue

# A real-time event control center.

Every signal from the event surface — registrations, revenue, sessions, campaigns — unified into a single live dashboard.

LIVE TRACKING

### Attendees on site

Minute-by-minute occupancy across rooms and zones.

REVENUE

### Ticket & sponsor income

Live revenue rollup with channel breakdown.

SESSIONS

### Performance insights

Engagement scores per session and speaker.

MARKETING

### Campaign analytics

Email and WhatsApp performance, by campaign.

TYPICAL ATTENDANCE

**3K – 15K**

Attendees per event range

# 04

# The Platform.

Eight purpose-built modules that cover the full event lifecycle — from setting up the event to publishing the gallery.

WHAT'S INSIDE

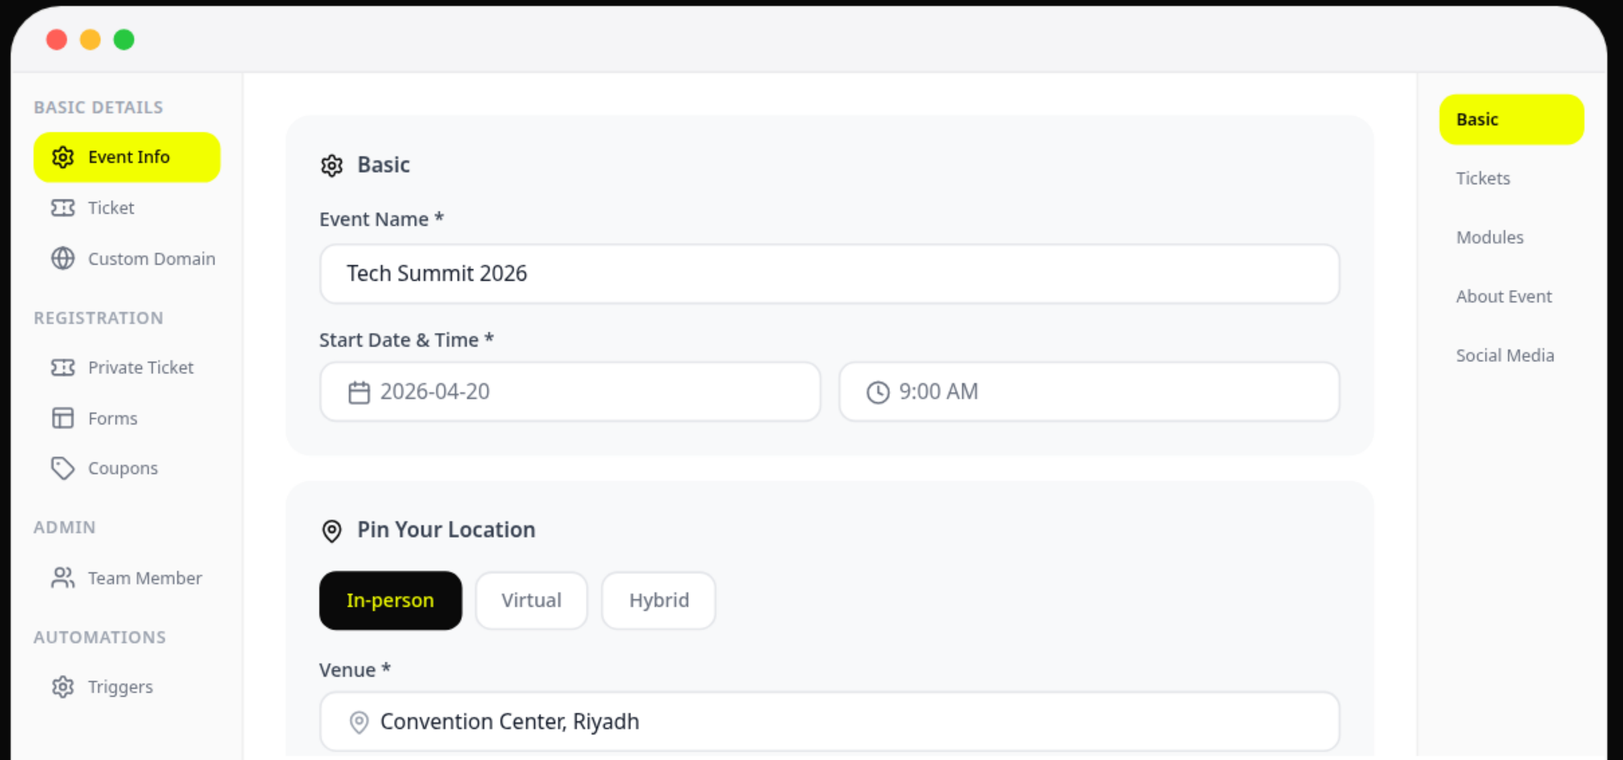

- Event Setup, Agenda Builder, Ticketing
- Attendees & Check-in, Website Builder
- Email & WhatsApp, Analyst AI Dashboard, AI Photo Gallery

# Stand up an event in one guided flow.

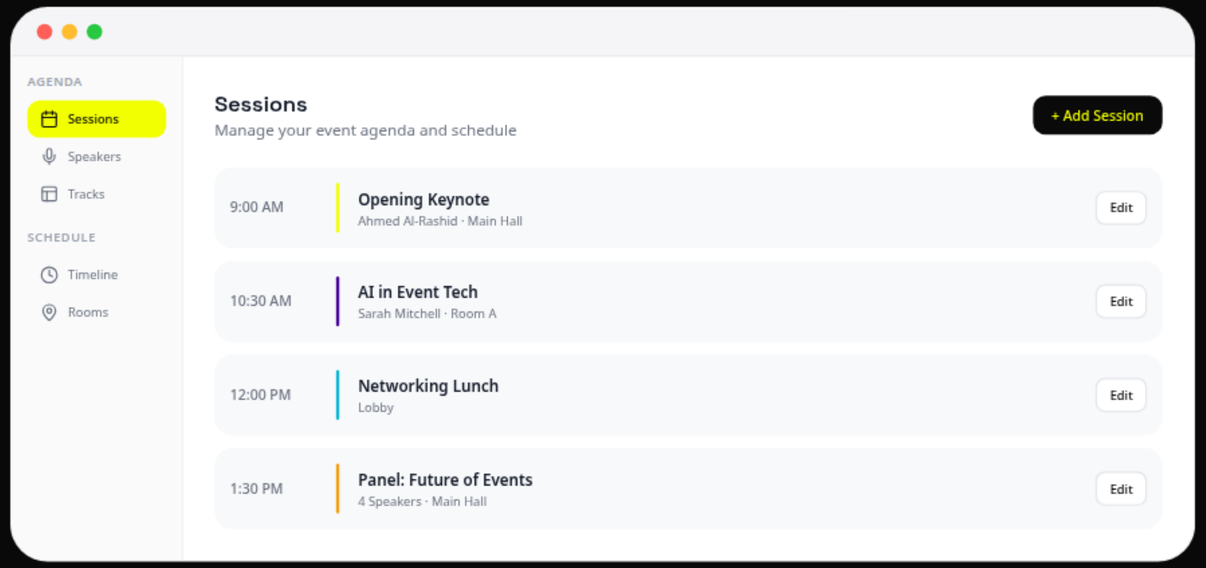

A step-by-step builder captures every essential — name, dates, venue, format and registration mode — so producers go from blank slate to live event without leaving the page.

01 Basics → 02 Venue → 03 Format → 04 Registration

EVENT SETUP

AGENDA BUILDER

# Schedule sessions, speakers & rooms.

Build the entire program on a visual timeline — assign speakers, allocate rooms and adjust on the fly while the attendee app updates instantly.

01 Drag-and-drop session timeline

02 Multi-track and multi-room scheduling

03 Live sync to attendee mobile app

● Live sync to attendee app

08:00 09:00 10:00 11:00 12:00 13:00 14:00 15:00 16:00

# Tiered ticketing, priced for every audience.

Unlimited tiers with capacity caps, promo codes and live sales tracking — built to handle public-launch surges.

Promo codes | Group rates | Waitlists | Live revenue

EARLY BIRD

# 05

# Trust & Next Steps.

How we keep the platform safe and reliable — and what it takes to get from this conversation to a live event.

WHAT'S INSIDE

- Security, hosting and reliability commitments
- Next steps and engagement model

# Hosted in Saudi Arabia. Secured end-to-end.

Sovereign infrastructure inside the Kingdom, defense-in-depth controls, and enterprise-grade safeguards applied uniformly across every tenant.

HOSTING

## Alibaba Cloud · KSA region

Sovereign cloud hosted inside Saudi Arabia.

TRANSPORT

## SSL / TLS 1.3

HTTPS enforced everywhere with HSTS.

ENCRYPTION

## End-to-end · AES-256

Encrypted in transit and at rest.

ENTERPRISE SAFEGUARDS

### MFA

Multi-factor authentication on all admin access

### SSO

Enterprise sign-on via SAML / OIDC

### Audit Logs

Immutable trail of every privileged action

### Data Residency

All data stored inside the Kingdom

### Disaster Recovery

Automated backups & multi-AZ failover

# A Saudi company. A Saudi product. On the ground with you.

Aligned with the Personal Data Protection Law — your data, your team, and your event are protected.

PILLAR 01

## Saudi company

Registered and operating in the Kingdom — full local accountability.

PILLAR 02

## Local support team

Arabic-first, Riyadh-based support across the working week.

PILLAR 03

## Hosted inside KSA

All data stored in-Kingdom on Alibaba Cloud (KSA region).

PILLAR 04

## On-site event team

Boots-on-the-ground crew for setup, check-in and live ops on event day.

nvolve

# nvolve is your event operating system.

Built for speed, scale, and intelligence — and trusted by leading initiatives across Saudi Arabia.
